

# PUBLIC NOTICE

## Henderson Hill Timber Sale

The Montana Department of Natural Resources and Conservation (DNRC) is considering timber harvest activities on school trust lands in Sections 19 and 30 T19N R29W. These sections are located approximately 13 miles northwest of St. Regis, Montana in the St. Regis River drainage.

The DNRC is proposing to harvest approximately 1 million board feet (1,000 MBF) of sawtimber from approximately 300 acres using a combination of Commercial Thinning and Shelterwood prescriptions. Project objectives include generating revenue for the Public Buildings trust, maintaining forest productivity and promoting natural regeneration.

This sale is currently in the early planning stages. At this time, we are identifying issues and concerns related to the project. If you wish to comment on the proposed project or have questions, contact:
